TECHNICAL NOTE

U.S. DEPARTMENT OF THE INTERIOR – BUREAU OF LAND MANAGEMENT

VEHICLE LOG BOOK HOLDER

by

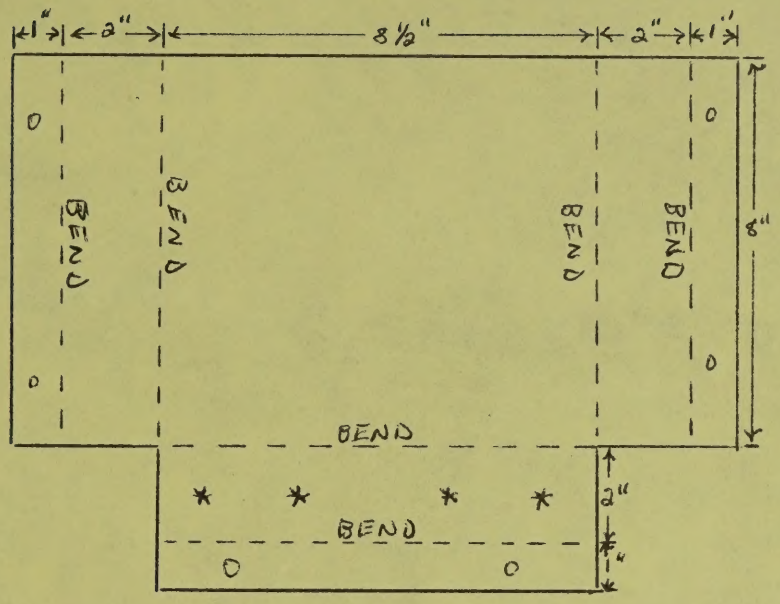
Robert S. Whitaker
Susanville District -- California

A simple, inexpensive, easy to fabricate vehicle log book holder is recommended for optional use by Bureau offices on Bureau owned vehicles.

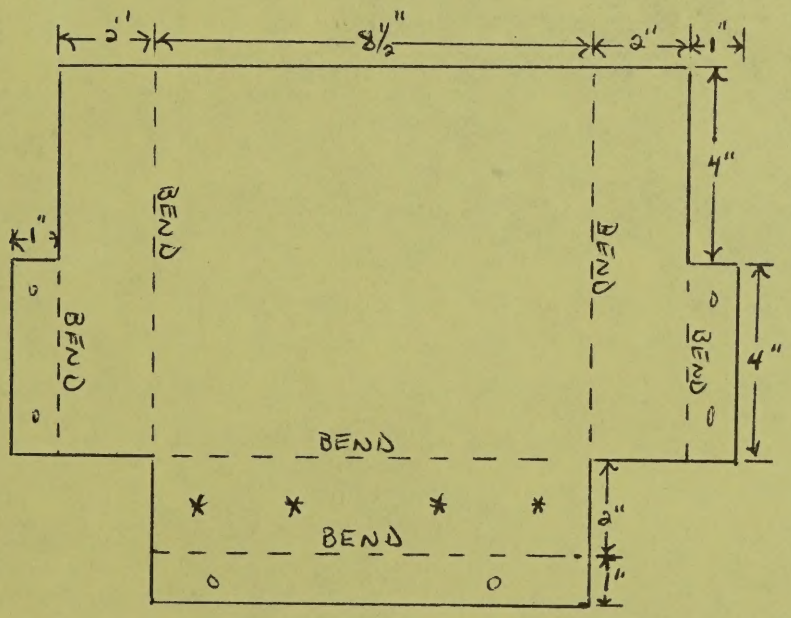
Additional copies of Technical Notes are available from DSC, Federal Center Building 50, Denver, Colo., 80225

Vehicle log books are usually stored in the vehicle's glove compartment. But, the glove compartment on today's vehicles is usually too small. As a result, the book is stowed on top of the dash, on the seat, or on the floor. This is not a recommended practice. First of all, occupants are subject to injury because sudden vehicle movements have been known to make unguided missiles out of loose objects. Secondly, after a field season the book is in a battered condition with missing, torn, or mutilated pages.

A metal vehicle log book holder can be fabricated and attached to the vehicle's driver side door. However, each holder must be fabricated to fit the door's contour. For example, a holder on a Ford truck is different than a holder on a Dodge truck. It has been found that because of door construction, a holder for the newer Jeeps (those that have doors) cannot be attached as shown.



FOR DODGE PICKUPS - DEPENDS ON DOOR PANELING



MODIFICATION: FOR FORD AND G.M.C. PICKUPS - DEPENDS ON DOOR PANELING

*Optional: ½" holes drilled to prevent accumulation of dirt.
